Swagat Gudadhe

Data Scientist | Python, SQL, ML | MBA | GenAI Enthusiast | Turning Data into Business Outcomes

Bengaluru, Karnataka, India

Summary

I'm a Data Scientist with a strong engineering foundation and a passion for applying data, machine learning, and intelligent systems to real-world business problems. I work at the intersection of technology and strategy — where insights drive action and automation powers smarter decisions.

I've built backend systems for analytical reporting, developed predictive alerting pipelines, and deployed ML-based anomaly detection to improve system efficiency and decision-making. Projects include a smart sootblower optimizer, a real-time notification system for operational readiness, and an incident detection module that flags behavioral deviations to support proactive maintenance. I've also analyzed complex datasets using techniques like Isolation Forest, K-Means, PCA, and Hierarchical Clustering to uncover actionable insights.

My stack includes Python, SQL, Power BI, Pandas, NumPy, scikit-learn, and API development — enabling end-to-end solution delivery from data pipelines to insight generation. I'm also a GenAI enthusiast, currently exploring LangChain, RAG workflows, and the application of LLMs in business automation and intelligent systems.

I'm seeking opportunities to build scalable, data-powered products that bridge technical depth with real business impact.

Experience

ExactSpace

Data Scientist

March 2023 - March 2026 (3 years 1 month)

Bengaluru

Education

University of Hyderabad

PG Diploma in Artificial Intelligence & Machine Learning · (September 2021 - September 2022)

Savitribai Phule Pune University

Master of Business Administration - MBA, Business Analytics · (2020 - 2022)

Sant Gadge Baba Amravati University, Amravati

Bachelor's degree, Engineering
